I have for the mean (494.9) and for the median (77.0) in thousands of dollars. These values are the averages of the means and medians for each of the 5 implicates.

For the mean., I have for

imp s.e. 8550.0516
sampling s.e. 7730.1141

combined s.e. 12144.082 which compares with 12.7k in the article

For the median, I have for

imp s.e. 1098.7174
sampling s.e. 2360.7093

combined s.e. 2649.8235 which compares with 2.8k in the article
